Special attention is paid to the index of investment costs as the most popular measure used in comparative analysis of alternative projects. The methods of evaluating compared projects with different terms and scales under conditions of limited financing and on the basis of forward rates are proposed.

Key words: profitability index; alternative (mutually exclusive) project; profitability index of investment costs; volatility; project duration; different-scale projects; projects with various periods of validity.

Accounting, Analysis and Audit

Shaulyukou A.

Applied aspects of statistical sampling survey methods during internal audit	
in consumer cooperation organizations	24

The article presents the applied methodological aspects of using a statistical approach to sample frame formation during internal audit in consumer cooperation organizations. The author of the article reveals the methodology of the audit sampling formation using probability theory and mathematical statistics, as well as the possibility of audit risk minimizing. To illustrate the sampling methodology, a relative population of records of calculations analytical accounting is used.

Key words: internal auditing; methodical ensuring of sampling formation; audit sampling; population; system sampling; statistical samoling study; rate of tolerable error; standard deviation of variational mark (dispersion); marginal sampling error; confidence coefficient; risk of sampling method.

Modern Technologies

Lilishentseva A., Egorova D., Semenchukova D.

The article considers international and national requirements for the quality and naturalness of tomato juices as well as its nutrient analysis. When performing the work, standard research methods were used. Dry soluble substances, the mass fraction of chlorides, the mass fraction of titratable acids in terms of citric acid, the content of hydromethylfurfurol and the formol index were defined in 5 tomato juice samples. The quality assessment shouldn't be based only on a simple study of the indicators and a comparison of the results obtained with the basic quantitative values. But it should provide for an overall study, including the deviations causes analysis that may be conditioned by the raw materials properties and manufacturing procedure.

Key words: juice; nutrient analysis; quality; authenticity; identification; vegetable juices.

Macroeconomic Problems of the Society Development

Doroshko V., Dovgulevich V	•
	ation problems and prospects of the world and Belarusian experience nagement in the digital economy35
	The article describes and analyzes the harmonization problems and prospects of the world and Belarusian experience of project management in the digital economy.
	Key words: project management; corporate and national strategies; proactive development; competitive ness; sustainable development.
	Abroad Abroad
Belyatskaya T.	
Tendencies of	the global e-commerce market44
	The e-commerce market is the most mature and at the same time the most dynamically developing marke of the e-economy at the present time. However, American companies and Chinese players continue to make the largest contribution to the global e-commerce market. The article discusses the market current state, as well as the main strategies that allow maintaining leadership positions for a long time and form trends in its development.
	Key words: digital economy; e-markets; e-commerce; Amazon; marketplace; electronic marketplace.
Gitkovich L.	
	vnership in transitional economies: formation and model building
	The article examines the joint-stock ownership formation in countries with transitional economies Corporization methods in transitional economies, their goals and results are considered and analyzed the joint-stock ownership formation process in a transitional economy at the macro- and micro-levels is modeled.
	Key words: joint-stock ownership; corporization methods; transitional economy.
	History and Theory of Consumer Cooperatives
Aksenov A.	
	nsumer cooperation system of the post-war period: d economic activity56
	The article is devoted to the post-war history of Belarusian consumer cooperation. The period of 1944-1961 is considered, when the system of the Belarusian Republican Union of Consumer Societies was fully restored and made a significant contribution to the socio-economic development of the BSSR.
